

武汉大学
WUHAN UNIVERSITY

To whom may concern,

It would be my pleasant to write this recommendation letter for Jiongyan Zhang. As his lecturer of some courses and project leader, I hope I can provide some details about Jiongyan's advantages and competencies, to prove that he could fit whatever jobs within his domain.

I have taught Jiongyan Zhang's three courses: Development of Geographic Information Engineering Software, Geographic Information Engineering Design and Database's Principles and Applications. He got 90+ in all the courses, which demonstrates his ability in the Data Science related field. His academic ability will support him to meet the requirements in Data Management, Data Processing and Data Analysis.

In addition to the class contact, he has also participated in some scientific research or projects of my team. In 2019, he was devoting to developing a display platform for student in the GIS department, which benefited all the students in our department, while certifying his developing ability.

Besides, Jiongyan has an incredible enthusiasm for DS and GIS technology, which is one of the driving forces for him. He is enthusiastic in learning some techniques related to Machine Learning and High-performance Computation. I believe that he will make achievements in his domain, for he assiduously learns the relevant knowledge in his field and puts it into practice. Considering the position he is going to apply, I do think he will fit your requirements properly.

Therefore, I would like to recommend Jiongyan for your organization. He can bring new vitality to your team in future work, and complete his ideal at the same time. Please do not hesitate to contact me via my email, should you require any additional information.

A handwritten signature in black ink, which appears to read 'Qingxiang Meng', is placed above the typed name.

Sincerely

Dr. Qingxiang Meng

School of Remote Sensing and Information Engineering
